## 1. ER Diagram

## 2. Create Database:

```
CREATE DATABASE Hospital;
```

## 3. Use Hospital Database:

```
USE Hospital;
```

## 4. Create tables:

```
-- Patient table
CREATE TABLE Patient (
  PatientID INT PRIMARY KEY,
  EName VARCHAR(255),
  LName VARCHAR(255),
  Age INT,
  Gender VARCHAR(10),
  Address VARCHAR(255),
  Phone VARCHAR(20),
  Disease VARCHAR(255)
);
```

```
-- Receptionist table
```

```

CREATE TABLE Receptionist (
  ReceptionistID INT PRIMARY KEY,
  Name VARCHAR(255),
  Contact VARCHAR(20),
  Gender VARCHAR(10)
);

-- Doctor table
CREATE TABLE Doctor (
  DoctorID INT PRIMARY KEY,
  Name VARCHAR(255),
  Specialization VARCHAR(255),
  Contact VARCHAR(20),
  EmploymentType VARCHAR(20)
);

-- Room table
CREATE TABLE Room (
  RoomID INT PRIMARY KEY,
  RoomType VARCHAR(255),
  Availability VARCHAR(20)
);

-- Nurse table
CREATE TABLE Nurse (
  NurseID INT PRIMARY KEY,
  Name VARCHAR(255),
  Contact VARCHAR(20),
  Gender VARCHAR(10),
  RoomID INT REFERENCES Room(RoomID)
);

-- Inpatient table
CREATE TABLE Inpatient (
  InpatientID INT PRIMARY KEY,
  AdmissionDate TIMESTAMP,
  DischargeDate TIMESTAMP,
  RoomID INT REFERENCES Room(RoomID),
  PatientID INT REFERENCES Patient(PatientID),
  DoctorID INT REFERENCES Doctor(DoctorID),
  NurseID INT REFERENCES Nurse(NurseID)
);

-- Outpatient table
CREATE TABLE Outpatient (
  OutpatientID INT PRIMARY KEY,
  VisitDate TIMESTAMP,
  PatientID INT REFERENCES Patient(PatientID),

```

DoctorID INT REFERENCES Doctor(DoctorID), ReceptionistID INT REFERENCES Receptionist(ReceptionistID) );
-- Appointment table CREATE TABLE Appointment ( AppointmentID INT PRIMARY KEY, PatientID INT REFERENCES Patient(PatientID), DoctorID INT REFERENCES Doctor(DoctorID), ReceptionistID INT REFERENCES Receptionist(ReceptionistID), AppointmentDate TIMESTAMP, CreatedTime TIMESTAMP );
-- LabReport table CREATE TABLE LabReport ( ReportID INT PRIMARY KEY, ReportDate DATE, Details TEXT, PatientID INT REFERENCES Patient(PatientID), DoctorID INT REFERENCES Doctor(DoctorID) );
-- Bill table CREATE TABLE Bill ( BillID INT PRIMARY KEY, Amount DECIMAL(10, 2), Date TIMESTAMP, ReceptionistID INT REFERENCES Receptionist(ReceptionistID), InpatientID INT REFERENCES Inpatient(InpatientID), OutpatientID INT REFERENCES Outpatient(OutpatientID) );

## 5. Insert Scripts:

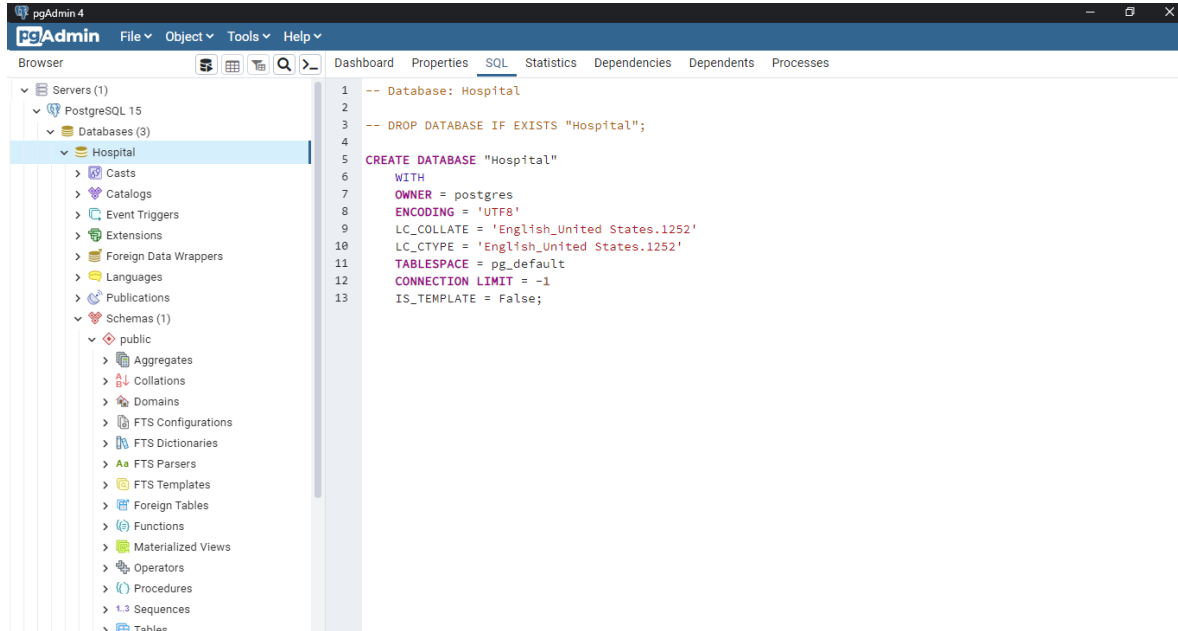

INSERT INTO Patient (PatientID, EName, LName, Age, Gender, Address, Phone, Disease) VALUES (1, 'Ramesh', 'Kumar', 42, 'Male', '123, Gandhi Nagar, New Delhi, India', '+91 98765 43210', 'Hypertension'), (2, 'Priya', 'Sharma', 35, 'Female', '456, Kaveri Street, Bangalore, India', '+91 98765 43211', 'Diabetes'), (3, 'Amit', 'Patel', 50, 'Male', '789, Shivaji Marg, Mumbai, India', '+91 98765 43212', 'Arthritis');

## 7. Useful Join Details

### 1. Joining Patient with Inpatient to get patient details

```
SELECT Patient.*, Inpatient.*
FROM Patient
INNER JOIN Inpatient ON Patient.PatientID = Inpatient.PatientID;
```

### 2. Joining Outpatient with Doctor to get outpatient details

```
SELECT Outpatient.*, Doctor.*
```

```
FROM Outpatient INNER JOIN Doctor ON Outpatient.DoctorID = Doctor.DoctorID;
```

*3. Appointment with Patient, Doctor, and Receptionist to get appointment*

```
SELECT Appointment.*, Patient.*, Doctor.*, Receptionist.*  
FROM Appointment  
INNER JOIN Patient ON Appointment.PatientID = Patient.PatientID  
INNER JOIN Doctor ON Appointment.DoctorID = Doctor.DoctorID  
INNER JOIN Receptionist ON Appointment.ReceptionistID =  
Receptionist.ReceptionistID;
```

*4. Joining LabReport with Patient and Doctor to get lab report details*

```
SELECT LabReport.*, Patient.*, Doctor.*  
FROM LabReport  
INNER JOIN Patient ON LabReport.PatientID = Patient.PatientID  
INNER JOIN Doctor ON LabReport.DoctorID = Doctor.DoctorID;
```

*5. Joining Bill with Inpatient, Outpatient, and Receptionist to get bill details*

```
SELECT Bill.*, Inpatient.*, Outpatient.*, Receptionist.*  
FROM Bill  
LEFT JOIN Inpatient ON Bill.InpatientID = Inpatient.InpatientID  
LEFT JOIN Outpatient ON Bill.OutpatientID = Outpatient.OutpatientID  
LEFT JOIN Receptionist ON Bill.ReceptionistID = Receptionist.ReceptionistID;
```
